2/2 or 3/2 way Rocker-Solenoid Valve with separating diaphragm

Type 6126 can be combined with...

Type 2506

Cable plug Form C

Type 2505

Rectangular cable plug

Manifolds

- Valve with isolating diaphragm
- Compact design with 16 mm width and Cv ratings up to 0.058
- Flexible design for custom manifold assemblies
- High back pressure tightness, excellent cleanability and 100 % duty cycle
- Normally closed, normally open and universal function

The direct-acting rocker solenoid valve, Type 6126, is suitable for general applications in which compressed air, gases or slightly contaminated liquids are to be switched.

The medium is in contact exclusively with the housing material and the FKM seals. The heat input in the medium is minimal, because the housing is separated from the coil by a stainless steel plate.

The valves can be mounted directly or also single or manifold mounted. They are used for dosing, filling, mixing and distributing small quantities of medium.

Circuit function A

2/2-way valve,
direct-acting,
normally closed

Circuit function B

2/2-way valve,
direct-acting,
normally open

Circuit function T

3/2-way valve,
direct-acting,
universal functions
