## Электромагнитные клапаны для нейтральных и слабоагрессивных сред Burkert

## 2/2 and 3/2-way Rocker Solenoid Valve for analytical applications

- 10 mm width
- Orifice DN 0.8 to DN 1.6 with pressure range vacuum to 5 bar
- Medium separation, for aggressive fluids
- Direct acting

Type 6624 combines the reliable and successful Rocker principle with a highly innovative new actuator. The TwinPower concept of this actuator reduces the size greatly without loss in performance. Hence the 10 mm wide medium isolated rocker valve, 6624, with a 1.6 mm orifice and a pressure resistance of 2 bar, provides the same performance as a traditional 16 mm valve. In addition, the integrated power reduction decreases the energy consumption by 75%. In combination with other design features the heat transfer into the medium can be reduced to a minimum.

In the design of the 6624, the main benefits lie in its excellent cleanability and a high reliability. By using high performance materials the 6624 suits the handling of aggressive medium perfectly. The valve is available in a 2-way and 3-way version.

### Circuit function A

2/2-way valve, normally closed

### Circuit function B

2/2-way valve, normally open

### Circuit function T

3/2-way valve, universal function  
P<sub>1</sub>, P<sub>2</sub>
