## Pneumatically operated 2/2-way angle seat valve with stainless steel actuator

- Flow optimized stainless steel bodies with various port connections
- Trusted inner parts for long cycle life
- Actuator in stainless steel for demanding environments
- Large accessory program with stroke limitation and feedback

The pneumatically operated angle seat valve with stainless steel actuators fulfils the demands of tough process environments. Unrivalled cycle life and sealing integrity is guaranteed by the trusted self-adjusting spindle packing with V-seals.

The stainless steel actuator is designed to withstand tough conditions. Laser welding allows a design without seals and smooth surfaces that is both cleanable and robust. With a ducted exhaust air port the actuator can be isolated from the environment an optimum from a lifetime and hygienic point of view.

High flow rates are attained with the optimized cast stainless steel 2 way body. Placed within the Bürkert process valves various port connections and a large accessory program are available.

All wetted parts comply with the EC-Regulation 1935/2004, variants with FDA conformity are available on request, also explosion proof variants are available.

## Ordering information for valve system On/Off Type 8801-YV

A **valve system On/Off Type 8801-YV** consists of a **angle seat valve Type 2060** and feedback **Type 8697** (see separate datasheets). For the configuration of further valve systems Type 2060 and a feedback **Type 8697** (see separate datasheets) please use the "Request for quotation" on p. 11-12. [go to page](#)

### Angle seat valve Type 2060 Welded

### Electrical position feedback

More  
info.

### Type 8697

Actuator size 40 to 225

The pneumatic control unit Type 8697 is designed for integrated mounting on CLASSIC series 20XX process valves suiting the requirements of hygienic process environment Mechanical or inductive limit switches register the position of the valve.

### Features

- Compact design
- LED position indicator
- Mechanical or inductive limit switches for end position registering
- Easy to clean chemically resistant housing featuring IP65 / IP67, 4X Rating
- Optional intrinsically safe version acc. to ATEX

### Benefits

- Easy and quick installation
- High level of signal reliability thanks to self adjusting limit switches
- Signal safety through the automatic adjustment of the limit switches
- Minimised space requirement in the plant piping for more flexibility in plant design
