

Pneumatic rotary actuator for the automation of ball and butterfly valves

- Combination with ELEMENT control heads and positioners of Type 8691/8692/8693/8694
- Perfectly suited for hygienic and pharma applications
- 100% free of maintenance
- lean design
- Internal control air supply

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 2654 2/2-way ball valve 3-piece	▶
	Type 2651 2/2 or 3/2 way Ball Valve, 2-Piece	▶
	Type 2657 Ball Valve, manually-operated	▶
	Type 8691 Control head for de-centralised automation of ELEMENT process valves	▶
	Type 8692 Digital electropneumatic Positioner for the integrated mounting on process control valves	▶
	Type 8693 Digital electropneumatic process controller for the integrated mounting on process control valves	▶

Type description

The 2053 pneumatic actuator enables an automated actuation of ball and butterfly valves. The linear lifting motion of the drive piston is redirected in a 90° rotational movement of the drive shaft. The valve side interface is designed according to ISO 5211. In addition, the rotary actuator can be combined with the ELEMENT control heads and positioners of Type 8691/8692/8693/8694.

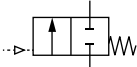

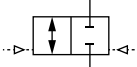

The return to the initial position of the single-acting actuators is caused by spring force. For the double-acting actuators, the movement in both directions is caused by compressed air. The welded construction of the stainless steel housing makes the actuator 100% maintenance-free.

Overall, the actuator is available in three different sizes: P0 - P1 - P2. All three sizes have a high torque despite their compact design. The air consumption per stroke cycle is very low due to the low cylinder volume. This ensures a remarkable energy saving potential.

1. General technical data

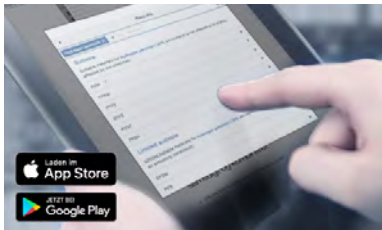

Product properties	
Dimensions	Detailed information can be found in chapter "4. Dimensions" on page 6.
Material	
Housing	Stainless steel
Drive shaft	Stainless steel
Piston	PA
Seal	NBR
Performance data	
Rotation	90°
Control pressure	4.8...8 bar, single-acting 3.0...8 bar, double-acting Max. 8 bar
Media data	
Control medium	Filtered compressed air with or without oil
Dust content	Class 5 (< 40 µm particle size)
Particle density	Class 5 (< 10 mg/m ³)
Pressure dew point	Class 4 (< 3 °C)
Oil concentration	Class 5 (< 25 mg/m ³)
Process/Port connection & communication	
Pilot air ports	Threaded hole G 1/8
Environment and installation	
Valve interface	ISO 5211
Control Head/Positioner interface	ELEMENT FA03
Ambient temperature	- 10 °C...+ 60 °C

2. Circuit functions

Control function	Description
	Type: A, pneumatically operated on/off valve 2/2 way Normally closed by spring force
	Type: I, pneumatically operated on/off valve on either side 2/2 way Bidirectional Normally closed (without spring)

3.2. Material specifications

Central section

No.	Quantity	Element	Material
1	1	Bottom plate	304
2	1	Drive shaft	304
3	1	Pin	304/316L
4	2	Roller	20.401
5	1	Housing tube	304
6	1	Pressure spring	54SiCr6
7	1	Retaining washer	304
8	1	Piston	PA
9	1	O-Ring 72x5.2	NBR
10	3	Screw WN E5451 40x10-S	A2
11	1	Constant section retaining ring XFS-023	302
12	2	Sliding disk	IGLIDUR W300
13	1	O-Ring 19x2	NBR
14	2	Lock washer DIN 6799-5.0	A2
15	1	Cover	304

Interface for ELEMENT control heads and positioners

No.	Quantity	Element	Material
1	1	Shaft	304
2	1	Adaptor bolt	304
3	1	O-Ring 37.77x2.62	NBR
4	1	Shaft seal	EPDM
5	1	Socket	DU

Cover

No.	Quantity	Element	Material
1	1	Press-in socket	304
2	1	Sealing	EPDM
3	1	Press-in shell	304

5. Performance specifications

5.1. Torque chart

Single-acting

Note:

For the actuator choice, we recommend a safety torque equal to 1.3 times of the valve maximum torque.

Actuator size	Min. torque for 6 bar control pressure ^{1.)}
	[Nm]
P0	10
P1	28
P2	48

1.) For the balanced operation (ratio of the spring torque to the torque generated by compressed air) the actuator has to be operated with 6 bar compressed air. Lower control pressures reduce the torque.

Double-acting

Note:

For the actuator choice, we recommend a safety torque equal to 1.3 times of the valve maximum torque.

Actuator size	Torque (depending on the control pressure)			
	3 bar	4 bar	5 bar	6 bar
	[Nm]	[Nm]	[Nm]	[Nm]
P0	17	21	26	32
P1	26	36	44	50
P2	60	80	90	95

5.2. Air Consumption

Actuator size	Control function	Control pressure	Air consumption
		[bar]	[l/Stroke]
P0	double-acting	3...8	0.5...1.2
P1			0.8...2.0
P2			1.9...5.0
P0	single-acting	4.8...8	0.8...1.2
P1			1.2...2.0
P2			3.0...5.0

6. Product operation

6.1. Functional overview

Function	Description
	<ul style="list-style-type: none"> The linear lifting motion of the drive piston is redirected in a 90° rotational movement of the drive shaft. The return to the initial position of the single-acting actuators is caused by spring force. For the double-acting actuators, the movement in both directions is caused by compressed air. <p>Note for actuator size P2 in combination with Bürkert control units Position feedback „open“: Already at 75° opening angle Control range: 0...75° opening angle</p>

DTS 1000436877 EN Version: A Status: RL (released | freigegeben | valide) printed: 13.01.2021

7. Networking and combination with other Bürkert products

Note:

The actuator of Type 2053 is perfectly suited for the combined use with ELEMENT control heads/positioners (Type 8691/8692/8693/8694) and quarter turn valves like ball valves (Type 2651/2654/2657) and butterfly valves (Type 2671/2674). The described combination is named Type 8805.
